

1. Describe the relationship between each table.

2. Find the Product type, Product style, and SKU number for each product. (You may join different tables together to get your proper result)

```

1 • SELECT *
2 FROM onlineshop.products
3 LEFT JOIN onlineshop.products_skus
4 ON products.id = products_skus.product_id
  
```

id	title	product_type	created_at	published_at	id	product_id	product_style	sku	created_at	price

3. What's the total number of orders for each product type? What's the most popular product type?

```

1 • SELECT p.product_type,
2       COUNT(p.product_type) AS Num_of_Product
3 FROM onlineshop.products p
4 JOIN onlineshop.orders_items oi
5 ON oi.product_id = p.id
6 GROUP BY p.product_type
7 HAVING COUNT(p.product_type) > 0
8 ORDER BY Num_of_Product DESC
9

```

Subject: Recommendation for Improving other sales and website traffic

This Recommends

1. Boost gift cards sales
2. Give some seasonal discount
3. Figure out why total sessions are lower than page views

Background

Database is a collection of structured information that is electronically stored in the computer system. For eCommerce database mainly focused more on the presentation and how the data behavior goes.

Recommendation

1. Gift cards are beneficial to both customers and owners. Here are several benefits including increased brand awareness, boosting turnover, and loyalty, it is also easy to give away, etc.
2. Some of the reasons why the sales declined hard between each month could be not fulfilling the customer's needs, the product or service isn't unique, or no organic web traffic to support sales.
3. Talk to the marketing team and website development department to see why the page views are declining while the total sessions are higher during the year 2018.

Discussion

1. There are only 3 gift card orders from 2016 to 2018.
2. I noticed that the sales between seasons to season drop hard. For instance, in November 2017 the sales were 73,000 but declined straight to 20,000.
3. The total session in December 2017 was 142,064 and the total page views were 489,138. However, the total order in that month is only 342 which is the lowest between 2016 to 2018.

Next Steps

1. Invest some time creating gift card-centric banners on the website in order to make your customers or visitors aware that you are selling them. Create them with specific themes or events to boost sales.
2. I would recommend you try using the Google Analytics tool to maintain these problems. Also, have some seasonal events and discounts to catch customers' eyes.

3. Google analytics has the ability to visualize the conversion rate, turnover rate, sessions, pageviews, etc. It is a very useful and powerful tool for your website. Try to figure out why users only click on the website but didn't view more pages. (Ex: is the user not satisfied with the user interface or the products didn't catch customers' eye?)
